Experience

AcadNet Olympiad - Networking section

I took part in the **AcadNet Olympiad**, where I won **first prize** and the **gold medal** two years in a row, in **2024** and **2025**. This achievement was the result of **dedication** and **consistent hard work**. Preparing for the Olympiad taught me that sustained effort and a genuine passion for a field truly pay off. The experience helped me realize the **importance of focusing my energy** on what I enjoy and staying committed to **long-term goals**. It was a great opportunity to challenge myself and reaffirm that perseverance leads to success.

Developing a Security Level against ARP Poisoning

Working on a defensive layer to protect against ARP poisoning significantly sharpened my research, testing skills, and cybersecurity awareness. To design effective safeguards, I had to dive deep into networking protocols and analyze ARP's vulnerabilities, which improved my ability to dissect technical topics thoroughly. Testing the solution against various attack vectors enhanced my practical skills, as I had to simulate real-world attack scenarios to ensure the defense was robust. This project also heightened my overall awareness of cybersecurity threats, teaching me to anticipate potential weaknesses proactively and adopt a more security-focused mindset across all layers of system architecture.

This experience helped me develop my teamwork skills, learning to cooperate and communicate effectively with other team members to achieve common goals. Participating in the international competitions, which were conducted in English, also gave me the opportunity to improve my communication skills in English, both technically and interpersonal.

Internship - Metigla Company

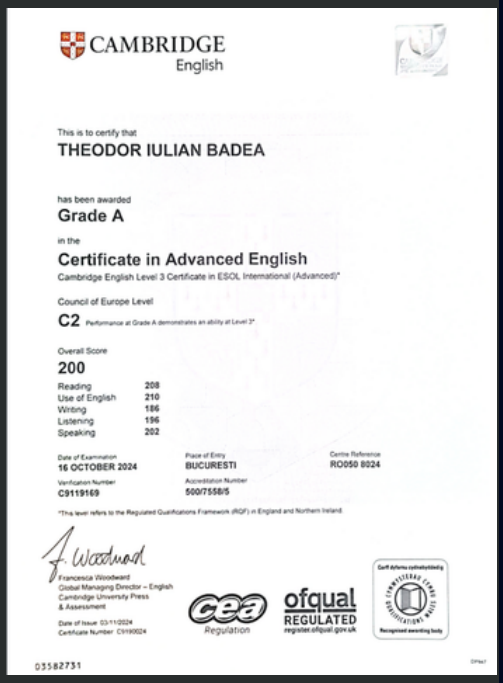

During my internship at Metigla, I had the opportunity to learn about the various roles and departments of a complex organization. I gained a thorough understanding of the responsibilities of each function and how they contribute to the overall success of the company. I realized how important it is for departments such as production, sales and human resources to work together to achieve common goals. This experience has given me valuable insight into the internal dynamics of an organization and how each employee contributes to the accomplishment of its mission.

AUSF - volunteering and personal development

I had the opportunity to volunteer with AUSF, where I participated in numerous activities and workshops that contributed significantly to my personal development. During my involvement, I learned how to effectively manage time and cope with stress by attending time management and stress management sessions. I also deepened my knowledge of human rights and learned how to communicate effectively in both professional and interpersonal contexts. The team building activities allowed me to work in a team and collaborate with other volunteers, strengthening my relationships and creating lasting friendships. My experience at AUSF has provided me with a balance between personal development and fun, being an environment where I have been able to develop my social and professional skills while enjoying enjoyable and constructive activities.

CERTIFICATIONS

- **Cambridge English Advanced**

CAMBRIDGE English

This is to certify that
THEODOR IULIAN BADEA

has been awarded
Grade A

in the
Certificate in Advanced English
Cambridge English Level 3 Certificate in ESOL International (Advanced)*

Council of Europe Level
C2 Performance at Grade A demonstrates an ability at Level 3*

Overall Score
200

Reading	208
Use of English	210
Writing	186
Listening	196
Speaking	202

Date of Examination: 16 OCTOBER 2024
Place of Entry: BUCURESTI
Centre Reference: RO050 8024
Verification Number: C9119169
Accreditation Number: 500/7558/5

*This level refers to the Regulated Qualifications Framework (RQF) in England and Northern Ireland

Satya Nadella

Online Verifiable

- **NWERA Association – Mentor & Networking Textbook Contributor (Honorary Member)**

Actively mentored high school students preparing for the ACADNET Olympiad in Applied Informatics (Networking section), offering technical guidance and exam preparation support. Contributed to the development of the first networking textbook published by the association, integrating hands-on knowledge and insights acquired through Olympiad training and experience.

- **UPRomania Hackathon – Participant**

Participated in the UPRomania Hackathon as part of a multidisciplinary team focused on social impact through technology. We designed a mobile application to support individuals with locomotor disabilities by connecting them with nearby volunteers for assistance in emergencies or daily challenges. The project emphasized accessibility, real-time communication, and community support, and showcased our commitment to using technology for inclusivity and social good. Gained hands-on experience in user-centered design, collaboration under pressure, and pitching impactful solutions.

- **Experience from International Competitions**

Presenting my project on ARP poisoning across several international competitions taught me how to explain technical concepts in a clear and accessible way. At WICE, INVENTCOR, and YISF, I presented "Defending Against ARP Poisoning", and at ISIF, the more advanced version "ARProtectors – Securing your Network from ARP Poisoning". While preparing for these events, I learned how to adapt my explanations so they could be understood even by judges without a background in networking or cybersecurity. The experience helped me improve not only my public speaking skills but also my ability to structure and simplify complex information, making it easier to communicate ideas across different levels of technical understanding.

Equally important was the opportunity to work within a team determined to create something meaningful. Collaborating with people I initially didn't know well taught me how to communicate effectively, share responsibilities, and align around a shared vision. It was inspiring to be part of a group where everyone believed in the project's value and was motivated to make a real impact.

IT EXPERTISE

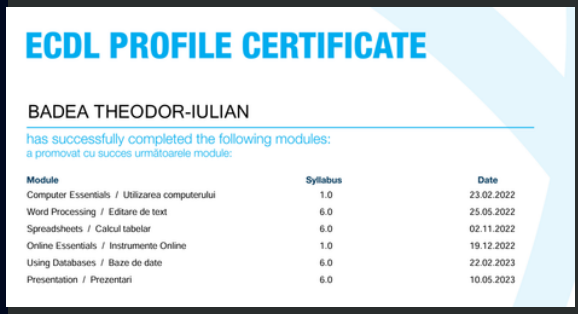

The skills I have acquired and projects

ECDL

During my ECDL certification preparation, I developed practical, hands-on skills across essential IT areas:

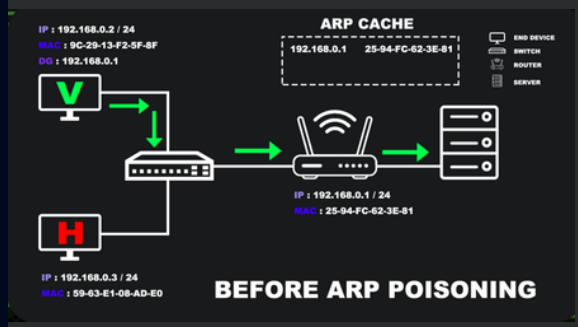

- **Computer Essentials:** Mastered core computing concepts, including hardware, software, OS, and file management. Proficient in optimizing performance and maintaining security.
- **Word Processing:** Advanced skills in Microsoft Word for professional document creation, formatting, templates, and mail merge.
- **Spreadsheets:** Proficient in Microsoft Excel with experience in formulas, data organization, pivot tables, and chart creation for streamlined data analysis.
- **Online Essentials:** Solid understanding of internet technologies, email management, and online security; skilled in safe and professional digital communication.
- **Using Databases:** Competent in Microsoft Access, covering database design, queries, and report generation for structured data management.
- **Presentation:** Skilled in Microsoft PowerPoint for creating clear, engaging presentations with multimedia elements and a structured approach.

I applied these skills in real-life settings, making me confident in handling a variety of digital tasks professionally and efficiently.

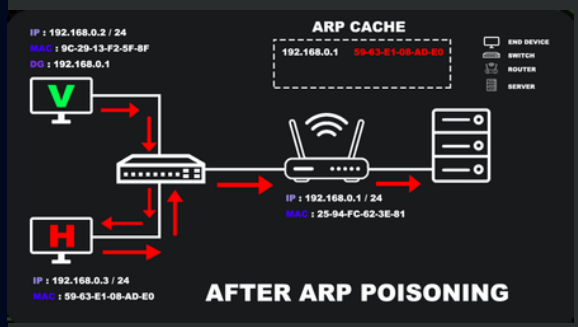

Security Layer Development

Developed a security layer using **Python**, gaining proficiency with **libraries** such as tkinter, os, sys, subprocess, and pystray, as well as Windows PowerShell commands. This project involved designing a **robust security framework**, enhancing both my **programming skills** and my familiarity with **system integration** and **automation** techniques.

IPv4 VLSM Subnetting Calculator

Designed and implemented a **Variable Length Subnet Mask (VLSM) calculator** in **Python** to deepen my understanding of **IP subnetting**. The tool **automates** subnet calculations for multiple VLANs, generating a **detailed Excel report** with key information for each subnet, including **VLAN ID, network address, broadcast address, subnet mask, and host range**. This project improved my **Python programming skills, Excel integration**, and **subnetting expertise**, enabling **efficient network planning and management**.

Visualizing the ARP poisoning attack

AI Olympiad preparation

I have been invited to train for the prestigious **International AI Olympiad** (IOAI), where I gained in-depth knowledge of advanced **AI techniques** and **concepts**. Although I was not selected for the final national team, this experience significantly enhanced my understanding of AI methodologies, practical applications, and emerging trends in the field.

National Olympiad in Informatics Participant

Competing in the National Olympiad in Informatics was a pivotal experience, where I tackled challenging problems in **C++** and immersed myself in **algorithms** like Dijkstra's, binary search, fast exponentiation, and range minimum query. Learning these techniques not only strengthened my skills but also fueled my passion for programming and deepened my appreciation for the power of efficient algorithms.

The menu of my IPv4 VLSM calculator

CCNA Preparation and Networking Olympiad

Through my preparation for the **CCNA certification**, I developed a strong passion for **networking**, dedicating countless hours to working in simulators such as Packet Tracer and Boson NetSim, as well as exploring various online resources to deepen my understanding. This commitment culminated in my participation in the **Networking Olympiad**, where I had the opportunity to test my skills against others. I was thrilled to earn first prize and a gold medal, reinforcing my enthusiasm for the field and my desire to pursue a career in IT networking.

Cybersecurity Knowledge

After completing the Endpoint Security course on Skills for All, I gained valuable insights into various **cyber threats** and **effective countermeasures**. This foundational knowledge has been instrumental in shaping my understanding of **cybersecurity** principles. Motivated by this learning. My growing passion for **cybersecurity** also inspired me to create an **ARP poisoning** security layer, where I applied my skills to develop practical solutions for real-world security challenges.
